

ID Tube Scarf

NEW!

SWEEP 5510 XHD SCRAP CHOPPER ▶
The **ID TUBING SCARF** Solution
Built in the USA

- Increase safety!
- Eliminate ID scarf scrap handling!
- Produce valuable by-product!

The Model 5510 XHD Dual Infeed has proven to be an excellent unit for processing ID tubing scarf. The trimmed scarf is transformed into the chopper via a water blow out system. The unit is designed with a 10 HP flywheel drive, wash-down electrical and a quad knife flywheel to achieve 800 FPM. This unit can easily be customized to fit in most any tube scarf application.

5510 XHD Dual Infeed

- 10 HP Drive Motor
- 3-Phase 230/460 volt
- Dimensions: 36" x 54" x 40"
- Weight: 3740 lbs.

SWEED MODEL 5510 XHD ID SCRAP CHOPPER

Sweed Model 5510 XHD ID blowout line

The Sweed Model 5510 XHD is equipped with a quad knife design (four cuts per rotation), three flywheels, 10 HP, and a 8000 SFPM infeed velocity.

Two tubes are processed at the same time. A blast of water followed by compressed air delivers the ID scarf into the chopper. The ID scarf is chopped up into random lengths from 6 to 8 inches.
